## PROJECTS

---

**AnonChat** ( [Github](#) ) ( [Demo](#) )

February 2026

- **Tech Stacks:**Node.js, Express.js, Redis, Socket.IO, Next.js, Python (FastAPI), Tailwind CSS
- **Description:** A privacy-first, real-time anonymous chat platform enabling safe 1-to-1 conversations without storing any user data.
- **Features:**
  - Anonymous onboarding (no accounts)
  - Real-time matchmaking (Redis + WebSockets)
  - AI-based human verification (liveness detection)
  - Stateless chat (no message storage)
  - Safety controls (rate limiting, reporting, PII filtering)

**INTERN KARO** ( [Github](#) ) ( [Demo](#) )

November 2025

- **Tech Stacks:**Node.js,Express.js,MongoDB,React.js,Tailwind CSS,Axios
- **Description:**A personalized internship discovery platform that helps students find opportunities based on their skills and GitHub activity.
- **Features:**
  - Internship Management
  - User Authentication
  - GitHub Integration
  - User Profile
  - Modern, Human-Centric UI

## CERTIFICATIONS

---

**Klymo Ascent 1.0** Unstop ( [Link](#) )

February 2026

- Secured 3rd place for building *AnonChat*, a privacy first anonymous chat platform with AI based human verification and real time matchmaking.
- Implemented stateless chat architecture using WebSockets and Redis, ensuring zero data persistence and scalable communication.

**Visual Vortex 2.0** Google Developers Group ( [Link](#) )

January 2026

- Achieved 3rd place by building *UniVerse*, an interactive platform solving event overload through AI driven recommendations and gamified user journeys.

- Implemented real time availability, smart event comparison, and a visual campus map for seamless navigation

## SKILLS

---
